副程式

```
int gcd(int a, int b)
   if (a % b == 0)
        return b;
   return gcd(b, a % b);
int lcm(int a, int b)
    return a * b / gcd(a, b);
```

```
int n, m;
printf("請輸入2個數字\n");
printf("數字1:");
scanf("%d", &n);
printf("數字2:");
scanf("%d", &m);
printf("最大公因數:%d\n最小公倍數:%d\n", gcd(n, m), lcm(n, m));
```
